KALSTEIN® Refractometer

Beer Refractometers

Model YR05939 // YR05943

Product Description:

The Kalstein hand-held optical Refractometer measures the density of sugars in the solution and gives you an instant gravity reading at any point during the boil, or run off from the mash. You do not need to convert the reading from Brix to specific gravity or do an adjustment for temperature. Great for quick and frequent check on the gravity of your running or while sparging, and also for those who do not like to deal with the temperature compensation necessary with a hydrometer. Unlike a hydrometer, it only requires a very small amount sample, about 2-3 drops of sample only.

Features:

- ✓ High quality body construction
- ✓ Uses ambient light only which means battery or power source is not required
- ✓ Easy to focus and calibrate
- ✓ Cushioned with soft & comfortable non-slip rubber
- ✓ With ATC function(Auto Temperature Compensation)
- ✓ Durable and built to last long
